

Tico Electronics Quality Policy

Tico Electronics is a contract company that manufactures high-value-added electro-mechanical products for use in the aerospace, medical and related industries.

We promote a competitive value of our services by continuous improvement of our quality management system, fulfilment of requirements, regulations and standardizing our processes to assure the reliability of our products.

We are committed to the development of human talent and maintaining a transparent and ethical relationship with our stakeholders. We continuously analyze key process indicators, emphasizing customer satisfaction, revenue growth and financial sustainability.
